# Association

**We are the Swiss Association for the Development of Agriculture and Rural Areas.**

**As an independent knowledge centre, we promote since 1958 sustainable, down-to-earth solutions for the Swiss agricultural and food economy. Our 120 employees in Lindau, Lausanne and Cadenazzo carry out projects, courses, publications and software solutions in strong partnerships.**

Through our agronomic and methodological knowledge, we bring experts from research, advisory services, public administration and field of practice together. In this key role, we contribute in the continuous adaptation of their management and production methods to the latest knowledge and technological progress.

Our association is based on a service agreement between the Federal Office for Agriculture (FOAG) and the Conference of Cantonal Directors of Agriculture (CDCA), which secures about half of our funding. The remaining income comes from the acquisition of mandates, the courses offered and the sale of publications, software and services, as well as the contributions of around 80 members. These members benefit from preferential rates for our services.
